NewSolutions Functionality and Value Cinch Deal for Family 1 FCU

Memphis TN - Family 1 Federal Credit Union, Placentia, CA, recently contracted with Share One, Inc., to convert to their NewSolutions core processing system. The conversion is scheduled for March of 2009. Pat White, President/CEO of Family 1 FCU, wanted a service-focused core processing system with the most robust functionality available for the money.

White's team at Family 1 worked through a debit card conversion delayed one year due to functionality issues with their existing core processor. That experience helped clarify their commitment to a switch and the features they wanted from a new system. White liked the NewSolutions processing system and the multiple features available with the standard system. "NewSolutions provides a multi-screen process that will allow our member services personnel to assist member requests as they occur. If a loan officer is in the middle of entering loan information and another member walks up with an immediate need, that officer can leave the loan screen without losing that information up to that point. This will save time both for the member and the employee," said White.

Daryl Tanner, President/CEO, said Share One, Inc., is committed to providing state-of-the-art technology and support credit unions needs when making the important decision to choose a new processor. "We show our clients that our team of professionals is dedicated to ensuring that a conversion goes efficiently. Share One has never had a credit union leave us once we get their business, and there is a good reason for that," said Tanner.

Share One, Inc. is a CUSO with a client base of over 60 credit unions ranging up to over one billion dollars in asset size and is a leading developer of credit union Internet software solutions. Their innovative core-processing product, NewSolutions, provides a full range of advanced
